

Express Genes™ by Eurofins MWG Operon Offers 4 Day Delivery of Synthetic Genes *New Express Service for Synthetic Genes is Fastest Advertised Delivery in the Industry*

Eurofins MWG Operon announces the newest entry in their drive to provide ISO-quality research products and services ‘faster than ever.’ Synthetic genes are a rapidly expanding area of business and clients are anxious to accelerate their research in this highly-competitive field of investigation. Customers throughout the US and Canada can now order the new Express Gene™ service as late as 3:00 p.m. ET for completion just 4 days later - a full day earlier than any advertised service from competitors.

“We’re excited to share our advances in gene synthesis services with our clients. Delivering Express Genes in just 4 days is faster than our competitors are able to advertise. Express Genes joins Overnight DNA sequencing (available for all US locations) and Express Oligos further extending our efforts to be the fastest DNA Company in the US,” stated Martin Kunz, CEO of Eurofins MWG Operon Inc. “The new Express Genes service benefits the research of any institution or company pursuing development in fast cycles.”

“Express Genes is an exciting new offering.” stated Helaman Escobar, Director of DNA Sequencing Operations at Eurofins MWG Operon Inc. “Advances in the laboratory have shortened our process for creating high-quality synthetic genes, which includes full DNA sequencing confirmation of the construct. These advances, and production of all gene synthesis under ISO 9001/13485 specifications, make Express Genes a highly competitive entry into the fastest growing segment of the DNA marketplace.”

Visit operon.com/express-gene for more information about Express Gene synthetic gene services.

About Eurofins MWG Operon

Eurofins MWG Operon, a member of the Eurofins Group with major offices and production facilities in the United States, Europe, and Asia, is an international provider of DNA sequencing services, DNA synthesis products, and bioinformatics services for academic and industrial research. The company’s strengths are its strong customer orientation, fast service, and high quality. For additional information, please visit our website at: operon.com.
